

United States Senate
WASHINGTON, DC 20510

COMMITTEES:
BUDGET
ENVIRONMENT AND PUBLIC WORKS
HOMELAND SECURITY AND
GOVERNMENTAL AFFAIRS
JUDICIARY
RULES AND ADMINISTRATION

April 4, 2023

The Honorable Patty Murray
Chair
Senate Committee on Appropriations
United States Senate
Washington, DC 20510

Dear Chair Murray,

I certify that neither I nor my immediate family has a pecuniary interest in any of the congressionally directed spending items that I have requested in the Fiscal Year 2024 Subcommittee on Interior, Environment, and Related Agencies Appropriations Bill, consistent with the requirements of paragraph 9 of Rule XLIV of the Standing Rules of the Senate.

Sincerely,

A handwritten signature in black ink, appearing to read 'Alex Padilla', written over the word 'Sincerely,'.

Alex Padilla
United States Senator

**Padilla, Alex(D-CA) Interior and Environment
Congressionally Directed Spending Requests**

Recipient Name	Project Purpose	Project Location	Amount Requested (\$000)
City of Alameda, CA	This project will replace existing, deteriorated water facilities as part of the redevelopment of the former Naval Air Station at Alameda Point to improve water safety and prevent contamination.	Alameda CA	\$1,500
Central Contra Costa Sanitary District	Central Contra Costa Sanitary District is initiating its Ultraviolet (UV) Disinfection Replacement Project to address aging infrastructure, sustainability, and regulatory issues.	Alamo, Danville, Lafayette, Moraga, Orinda, Pleasant Hill, Walnut Creek, portions of Martinez and San Ramon, unincorporated communities within central Contra Costa County, Concord, Clayton CA	\$4,000
National Park Service - San Francisco Maritime National Historical Park	These funds would cover a portion of the costs to support the rebuild of Municipal Pier (Muni Pier) in San Francisco.	City and County of San Francisco CA	\$500
City of Brisbane	Project would replace the Glen Park Pump Station which is more than 50 years old and has insufficient capacity to meet water demand in the City of Brisbane.	City of Brisbane CA	\$3,440
City of Burbank	Project will fund the design and construction of chloramine boosting systems for the City of Burbank's primary reservoirs.	City of Burbank CA	\$3,000
City of Camarillo	The project will construct a parallel sewer pipeline to serve as the primary sewerline for the City of Camarillo.	City of Camarillo CA	\$15,000
City of Chino Hills	This project will expand the City's recycled water system and supply recycled water to the following two key locations: Western Hills Country Club and English Road and English Springs Park.	City of Chino Hills CA	\$2,000
City of East Palo Alto, CA	The project will replace two aging water mains in the City of East Palo Alto that are leaking and causing impairments to the local water supply.	City of East Palo Alto CA	\$1,600
City of Fullerton	The City of Fullerton will construct a new water well, which will be equipped with a single new pump, motor, electrical equipment, and appurtenances.	City of Fullerton CA	\$2,000
City of Kingsburg	Funding for the acquisition of a ladder truck for the Kingsburg Fire Department.	City of Kingsburg CA	\$2,000
City of Long Beach	Funding to protect water quality in Alamitos Bay by replacing non fish-friendly pumps with new, fish-friendly pumps that bypass power plant cooling operations.	City of Long Beach CA	\$5,000
City of Madera	Rehabilitation of storm drain pipeline, from the intersection of Sunset Ave and Fourth Street to the intersection of Sunset Ave and Laurel Ave.	City of Madera CA	\$2,890
City of Madera	The City of Madera is requesting funds to install approximately 10,600 linear feet of permanent underground storm drain pipelines, associated manholes, and storm water inlets/outlets.	City of Madera CA	\$6,517

City of Oakland	Funds will support the development and implementation of a plan to address excessive algal growth and low dissolved oxygen (DO) concentrations in Lake Merritt in Oakland, California.	City of Oakland CA	\$1,000
City of Oceanside	Project will centralize wastewater flows to the central plant by constructing two lift stations and additional pipelines in the City of Oceanside.	City of Oceanside CA	\$4,000
City of Salinas	Funding for energy efficiency enhancements needed for the expansion of the Industrial Wastewater Treatment Facility in Salinas.	City of Salinas CA	\$2,500
City of San Diego	Funding to construct a Demonstration Central Area Small Scale Facility to demonstrate compliance and efficacy of recycled water requirements to assist with the Pure Water Phase 2 project. Once completed, Pure Water will supply 50% of the City's drinking water for its 1.4 million residents.	City of San Diego CA	\$5,000
City of Twentynine Palms	These funds will connect mobile home parks with the public sewer system in the City of Twentynine Palms, California.	City of Twentynine Palms CA	\$2,033
City of Vista	This project will improve drainage conditions, pedestrian access, and install permanent storm water best management practices in the City of Vista.	City of Vista CA	\$2,000
City of Yucaipa	Funding would support the construction of a basin facility of approximately 200-acre-foot capacity in the City of Yucaipa.	City of Yucaipa CA	\$2,000
City of Oakley	The City of Oakley requires upgrades to its storm drain system near the downtown hub of residential growth and economic development.	Contra Costa County CA	\$2,000
Georgetown Divide Public Utility District	This project would fund a 2 million gallon storage tank adjacent to the water treatment facilities in Georgetown, California.	Counties of Placer and El Dorado CA	\$1,500
Zone 7 Water Agency	Funds will construct a treatment facility to remove Per- and Polyfluoroalkyl Substances at 3 groundwater production wells	County of Alameda CA	\$7,000
County of Butte	Project funds roadside fuels reduction efforts on high-priority roadways to improve fire resiliency and fire breaks throughout high-fire severity zones in Butte County.	County of Butte CA	\$5,000
Central Contra Costa Sanitary District	Project to make infrastructure, sustainability, and regulatory improvements to the Solids Handling Facility in Contra Costa County.	County of Contra Costa CA	\$6,000
South Tahoe Public Utility District	Project will install a backbone pipeline in the water system, resolve existing fire flow deficiencies, install secondary feeds, and replace waterlines in South Lake Tahoe.	County of El Dorado CA	\$4,520
Santa Clarita Valley Water Agency	Project will fund the construction of a centralized facility to restore to service three groundwater wells that were taken offline due to PFAS contamination in Santa Clarita, California.	County of Los Angeles CA	\$3,000
Water Replenishment District of Southern California	Project to treat and remediate PFAS-affected drinking water wells in the City of South Gate.	County of Los Angeles CA	\$2,500
County of Monterey	This project will fund critical infrastructure and building improvements to the Porter-Vallejo Mansion in Pajaro, California.	County of Monterey CA	\$500

County of Napa	The Napa Berryessa RID wastewater treatment system improvement would install a membrane biological reactor, sludge dewatering equipment, electro-mechanical equipment, and other necessary improvements.	County of Napa CA	\$4,000
County of Nevada	This project will replace the infrastructure in sewer lift stations in Nevada County.	County of Nevada CA	\$728
Santa Margarita Water District	Project will construct a well head treatment to produce drinking water from a source otherwise impaired by PFAS and high salinity in Orange County, California.	County of Orange CA	\$1,750
Orange County Water District	Project will provide funding for the treatment of drinking water wells that support 2.5 million people in Orange County.	County of Orange CA	\$8,000
Mesa Water District	Project would replace existing pipelines in Orange County.	County of Orange CA	\$9,000
Mesa Water District	Project would construct an a one megawatt backup power generation facility at the Mesa Water Reliability Facility in Orange County.	County of Orange CA	\$2,000
City of Newport Beach	This project will design and construct a floating conveyor system along the shore to capture trash and debris from the 120 square mile tributary area drained by San Diego Creek, before it enters Upper Newport Bay.	County of Orange CA	\$1,593
County of Placer	Project would evaluate wildfire risk near Baker Ranch and Shirttail Canyon and develop a detailed treatment plan/budget for forest resilience activities in Placer County.	County of Placer CA	\$1,561
North Tahoe Public Utility District	Project will replace old and undersized water pipes and install new fire hydrants to provide adequate wildfire suppression water in North Lake Tahoe.	County of Placer CA	\$1,121
Rancho California Water District	Funding for the design and pre-construction costs required to improve water infrastructure in Riverside County.	County of Riverside CA	\$5,000
Valley Sanitary District	The proposed project will complete studies to expand and upgrade the wastewater treatment facility to accommodate Title 22 tertiary treatment for the purpose of recharging the Coachella Valley Groundwater Basin.	County of Riverside CA	\$1,920
Coachella Valley Water District	Funds to construct a regional stormwater channel to improve flood protection in Riverside County.	County of Riverside CA	\$3,000
Beaumont Cherry Valley Water District	This project would replace two critical wells that serve the broader Beaumont area in Riverside County.	County of Riverside CA	\$1,787
Carmichael Water District	Project funds the replacement of the Garfield Avenue pipeline which connects to the Sierra Aquifer Storage and Recovery well in Sacramento County.	County of Sacramento CA	\$2,500
Mojave Water Agency	The project will add a new pilot recharge basin in the upper portion of the Alto subarea in San Bernardino County.	County of San Bernardino CA	\$2,000
Inland Empire Utilities Agency	These funds will allow the Chino Basin Program to drill, test three exploratory borings, and complete two of the borings as permanent groundwater monitoring wells San Bernardino County.	County of San Bernardino CA	\$1,760

County of San Diego	Project to assess the wildfire vulnerabilities and needs of critical infrastructure for fire response and County-owned community centers used for temporary refuge areas.	County of San Diego CA	\$1,700
County of Inyo, CA	This project will create new septage ponds in Inyo County, which will service the liquid waste of both Inyo and Mono counties, making this a regional project. This project is high priority, as the current ponds are near capacity and temporarily exceeded capacity with the recent wet weather.	Inyo, Mono CA	\$800
City of California City	This project will improve water quality, system reliability, and resiliency.	Kern County CA	\$6,332
City of Compton	The City of Compton needs funds to replace and repair failing sewer lines serving the community.	Los Angeles CA	\$2,000
City of Los Angeles - Department of Water and Power	Project will provide 3.5 million gallons a day in additional advanced treated recycled water to protect against seawater intrusion into the West Coast Groundwater Basin.	Los Angeles CA	\$4,000
City of Beverly Hills	Project to retrofit the City of Beverly Hills Greystone, Coldwater, and Sunset drinking water storage reservoirs with Reservoir Management Systems to enhance system reliability.	Los Angeles CA	\$2,800
City of Burbank	To improve the quality and quantity of local storm drainage, BWP proposes to construct drainage improvements that would allow stormwater from adjacent properties to be intercepted and discharged into the Burbank Western Channel through a new outfall structure.	Los Angeles CA	\$3,510
City of Long Beach	This project will improve the safety and access of a major corridor in Long Beach. The construction of the new Shoemaker Bridge will require the relocation of the SD-01 Pump Station, which drains a portion of eastern Long Beach and discharges into the LA River.	Los Angeles County CA	\$5,000
City of Montebello	The project will replace 9,000 lineal feet of deteriorated 100-year old cement sewer in the downtown area of the city.	Los Angeles County CA	\$3,500
City of Norwalk	This project includes a redesign of the Senior Center parking lot to incorporate porous paving and ADA accessibility enhancements. This facility serves as a cooling/heating center, emergency shelter, and back up Emergency Operations Center.	Los Angeles County CA	\$2,000
City of Agoura Hills	This project will design and construct storm water conveyance improvements on Driver Avenue in the City of Agoura Hills to manage, reduce, and control storm water runoff.	Los Angeles County CA	\$1,000
South Coast Air Quality Management District	This funding will enhance an emergency operations center, including training and equipment for field and analytical operations.	Los Angeles, San Bernardino, Riverside, and Orange Counties CA	\$2,000
Marin Municipal Water District	Project will upgrade aging water meters in a disadvantaged community with new Automated Meter Infrastructure, which decreases water leaks and reduces service outages for customers.	Marin County CA	\$1,200
Monterey County	Funding for project to replace and repair sanitary system sewer pipes in the Pajaro County Sanitation District.	Monterey County CA	\$1,500

Monterey County Water Resources Agency	This project consists of rehabilitation and/or replacement of wells, water meters, and valves that are part of a conjunctive use system providing water for irrigation of farmland and protection of drinking water systems in a critically overdrafted groundwater.	Monterey County CA	\$3,000
Monterey County	The project would address ongoing water quality problems for the small, disadvantaged farming community of San Lucas, which have caused its residents to live under bottled water orders for eight of the past ten years.	Monterey County CA	\$2,000
Monterey One Water	This funding will support design modifications to existing water recycling facility to increase recycled water production for food crops and decrease groundwater pumping.	Monterey County CA	\$1,175
Nevada County	This project will replace 40 septic holding tanks in the Penn Valley sewer collection system that contribute significant amounts of inflow and infiltration of stormwater into the Penn Valley collection system.	Nevada County CA	\$640
Yorba Linda Water District	This project will replace three aging and unreliable water system pressure regulating stations to enhance firefighting flows and stabilize pressure zones.	Orange CA	\$600
Serrano Water District	The project will upgrade and seismically retrofit a reservoir which will result in increasing local water supply reliability and enhance public safety.	Orange County CA	\$5,000
City of Irvine	This project is a conservation-focused recycled water system central to the city's reuse plan for the former El Toro Air base	Orange County CA	\$2,000
City of Huntington Beach	The project will increase reliability of safe drinking water and reduce dependence on imported water.	Orange County CA	\$3,000
East Orange County Water District	The project will cover the hardware costs needed to upgrade the district's residential water metering infrastructure.	Orange County CA	\$1,440
City of Buena Park	This project will construct a new municipal water well in order to provide and a local supply of safe drinking water for the community.	Orange County CA	\$2,000
South Coast Water District	This project includes the installation of 5,500 linear feet of pipeline for recycled water and the conversion of five large usage sites that are currently irrigated by potable water to recycled water.	Orange County, CA CA	\$4,500
Tahoe City Public Utility District	Funding for a project to replace 80-year-old water infrastructure and ensure reliable drinking water and water for fire suppression along the west shore of Lake Tahoe.	Placer County CA	\$2,500
Placer County	This project will increase resiliency and reliability for two 50 plus year old drinking water well sites in the disadvantaged community of Sheridan by adding modern security measures and offsite monitoring capabilities for drought preparedness.	Placer County CA	\$1,500
City of Palm Springs	This project will construct 4,800 linear feet of underground storm drain infrastructure in Palm Springs Road to alleviate stormwater runoff, manage stormwater, and mitigate flood concerns within the City that occurs adjacent to Palm Springs High School.	Riverside County CA	\$2,250

Eastern Municipal Water District	This project will convey recycled water to groundwater recharge ponds in the upper San Jacinto groundwater basin, where it will be blended with diluent water for infiltration. A portion will receive additional treatment prior to recharge.	Riverside County CA	\$5,000
Western Municipal Water District	This project will upgrade all single check backflow devices (approximately 80) in Western Water's drinking water system to certified devices.	Riverside County CA	\$960
City of La Quinta	This project will upgrade existing undersized drainage infrastructure and create a direct outlet into the emergency flood evacuation channel.	Riverside County CA	\$2,000
City of Sacramento	Groundwater Well #168 is part of a larger groundwater well rehabilitation program that the City of Sacramento is undertaking.	Sacramento CA	\$2,800
City of Folsom, California	Develop a non-potable water source for irrigation purposes within the City's water service area, serving parks, landscaping, and residential common landscape areas.	Sacramento CA	\$250
Sacramento County	This project will expand critically needed potable water service for domestic use as well as fire protection to the area of East Walnut Grove. The current potable water supply infrastructure serving the area is sub-standard and poses a risk to health and safety.	Sacramento County CA	\$725
Citrus Heights Water District	Project to construct municipal well with Aquifer Storage and Recovery (ASR) technology.	Sacramento and Placer Counties CA	\$1,500
City of Rialto	The Rialto Wastewater Treatment Plant Microgrid & Biosolids Sustainability Handling Upgrade will be powered through a combination of biogas cogeneration, solar power, and backup battery storage to supply the majority of the electricity needed to operate its wastewater treatment plant.	San Bernadino CA	\$4,000
Big Bear Area Regional Wastewater Agency	Project to upgrade regional wastewater treatment plant and related facilities in Big Bear Valley.	San Bernardino County CA	\$2,500
San Bernardino County	The Cedar Glen Water Supply Improvement Project will ensure a dependable water supply and improved quality of water for the community.	San Bernardino County CA	\$5,000
West Valley Water District	This project includes the drilling and equipping of two (2) new groundwater production wells, storage tank, booster pump station and pipelines to transport the needed water supply to the various agencies.	San Bernardino County CA	\$3,000
West Valley Water District	This project will improve water service to a disadvantaged community.	San Bernardino County CA	\$3,632
Hi-Desert Water District	This Project would provide a drought-resistant irrigation supply to preserve vital community resources that serve disadvantaged communities.	San Bernardino County CA	\$4,716
San Bernardino Valley Municipal Water District	This project will help capture and recharge stormwater as it is released from the Seven Oaks Dam, which will help increase the availability of water supplies for the entire region--especially amid the ongoing drought conditions.	San Bernardino, Riverside CA	\$2,500

City of Laguna Beach	This project will replace the existing 35-year-old North Coast Interceptor Reach 5 segment in Aliso Canyon to reduce risk of sewer spills in Aliso Creek.	San Diego CA	\$2,000
Sweetwater Authority	The project will improve the water quality for a disadvantaged community by removing groundwater minerals that cause customers to receive red/brown discolored water.	San Diego County CA	\$1,500
Valley Center Municipal Water District	This project will replace critical 10,900 foot, over 50-year-old pipeline reaching end of service life to avoid additional failures due to deterioration. Replacement will eliminate future environmental damage, threat to community, and contamination of water supply.	San Diego County CA	\$3,772
Fallbrook Public Utility District	This project replaces an 80-year-old pipeline which serves district residents and the Naval Weapons Station, as well as emergency service to Marine Corps Base Camp Pendleton.	San Diego County CA	\$3,040
Borrego Water District	This project will provide critical infrastructure funding to accelerate replacement of aging water infrastructure in a severely disadvantaged community.	San Diego County CA	\$3,608
City of Del Mar	This funding will support the removal and replacement of the city's most critical water, sewer, and storm drain infrastructure.	San Diego County CA	\$1,120
San Joaquin County	Project to replace water mains, aging steel pipes, and water meters within Lincoln Village, a disadvantaged community in San Joaquin County.	San Joaquin County CA	\$3,500
City of Burlingame, California	Feasibility studies and planning for a water treatment plant facility and distribution system converting wastewater into reclaimed water, and the distribution system will deliver the reclaimed water to potential customers along the Bayfront area.	San Mateo CA	\$800
Port of Redwood City	Funding to upgrade stormwater infrastructure at the Port of Redwood City.	San Mateo County CA	\$700
City of Santa Maria	Funding for the Santa Maria Storm Drainage Improvement Project to protect the community from the worst impacts of rainfall induced flooding.	Santa Barbara County CA	\$3,446
Solano Irrigation District	Funding to support the consolidation of Gibson Canyon Improvement District and Pleasant Hills Ranch Estates Public Water Systems to facilitate the connection of existing homes that currently use point-of-entry treatment and bottled water for drinking.	Solano County CA	\$3,400
Sonoma County Water Agency	This funding for improvements at the Russian River County Sanitation District treatment plant to increase its sustainable treatment capacity during Russian River flood events.	Sonoma County CA	\$1,500
Sonoma County Water Agency	The Penngrove Sewer Force Main Upgrade Project is intended to eliminate capacity limitations in the community's sewer collection system that contribute to Sanitary Sewer Overflows, and thereby reduce impacts to local creeks and improve water quality within the community.	Sonoma County CA	\$2,000
City of Turlock	Replacement and upsizing of over 1,120 feet of pipe in Turlock in order to create a positive drainage system and alleviate serious flooding in the City.	Stanislaus CA	\$2,000

City of Turlock	This project will provide critical out of boundary utility services to properties that are considered to be an unserved county area, currently on wells and septic tanks.	Stanislaus CA	\$1,500
City of Modesto	The project will rehabilitate a water main that is old, steel, undersized, and prone to leaks and low pressure.	Stanislaus County CA	\$800
City of Modesto	This project will replace existing water mains which are old and undersized mains with industry-standard 8- and 12-inch PVC water mains, as well as city-standard valves and hydrants.	Stanislaus County CA	\$1,900
City of Visalia	Project to improve stormwater capture to reduce flood risks and to replenish groundwater basin.	Tulare County CA	\$3,500
Tulare County	This project would complete the next phase of planning (engineering design, permitting, and environmental review) for a new sewer collection system and wastewater treatment facility for the community of Allensworth. The community's 521 residents currently rely upon failing septic systems.	Tulare County CA	\$1,700
City of Dinuba	Project will expand sewers in the industrially-zoned area of Dinuba to better serve existing businesses in the area. Existing sewer system is past its functional life, which exposes everyone in the area to potential environmental hazard.	Tulare County CA	\$2,400
City of Oxnard	Replace aging cast iron waterline pipes in the Kamala Park neighborhood. This project will systematically replace identified aging cast iron waterline pipes at risk of failure.	Ventura CA	\$2,113
City of San Buenaventura	The project is a seven-mile pipeline that will allow the City to access its California State Water Project entitlement through neighboring water agencies.	Ventura CA	\$5,000
City of Santa Paula	This funding will replace old steel water tanks with concrete reinforced tanks, adding storage for agricultural support and fire-fighting capability, ensuring reliability in standard and emergency scenarios.	Ventura County CA	\$1,500
City of Thousand Oaks	This project will develop a stormwater capture and diversion project to increase regional water supplies and improve local water quality.	Ventura County, Los Angeles County CA	\$3,000
